virtual style essence analysis

Your face holds the key to your most beautiful style.

The face is the primary point of visual focus in human interaction, and since clothing elements near the face directly affect how your features and expressions are perceived, dressing for your face will have a huge impact on you feeling like your most attractive self. It's the secret sauce that very few people know about.

You'll know your essence blend and the elements that make up the essences in your blend. For instance, if your blend contains Romantic, Natural and Dramatic, you'll know the necklines, clothing styles, fits, silhouettes, shapes, fabrics and types of accessories that generally suit each of those 3 essences best.

Includes:

- Virtual style essence analysis using a photo of your face.
- Style essence blend report (pdf) containing information about each of your essences, as well as a breakdown of the necklines, clothing styles, fits, silhouettes, shapes and fabrics that suit each of the essences in your style essence blend best. You'll also receive lots of images from my Pinterest boards of outfits in your blend for inspiration!
