personal shop in-person

This session functions at the top of its game when having done the Colour Analysis and Style Essence Analysis sessions beforehand.

The shopping session is incredibly fun and teaches you what to look for when you're at the shops.

You can choose the main focus for the session: for example, you might want me to help you find clothing in your colour season and style essence blend, you might need a new seasonal wardrobe or you might be looking for an outfit for an event!

You'll provide me an estimated shopping budget a couple of weeks before the session, and based on your budget and my prior knowledge about your wardrobe needs, I'll select the shopping centre that will serve us best.

During the session I'll guide you to the stores I've selected, let you try on pieces and outfits, provide my commentary and be your general companion for any style-related questions you might have while we're out. My goal is to take the anxiety out of shopping for you.

Session run-time: 4 - 5 hours

$650
