style essence analysis comprehensive

Your face holds the key to your most beautiful style.

The face is the primary point of visual focus in human interaction, and since clothing elements near the face directly affect how your features and expressions are perceived, dressing for your face will have a huge impact on you feeling like your most attractive self. It's the secret sauce that very few people know about!

You'll understand your style essence blend, your exact percentage of each essence and how the elements of your blend apply to you and your body type specifically. You'll also have a detailed list of all the elements that make up the essences in your blend; for instance, if your blend contains Romantic, Natural and Dramatic, you'll have all the necklines, clothing styles, fits, silhouettes, shapes, fabrics and types of accessories that belong to each of those 3 essences.

Includes:

- Pre-session virtual style essence analysis using a photo of your face.
- 2 hour in-person session where you try on outfits I've curated for you so we can confirm your percentages for each essence and how your blend applies to you specifically.
- In-session education throughout outfit try-ons. This is a super insightful session! Not to mention super duper fun.
- Bespoke comprehensive report (pdf) containing a detailed breakdown of how your essence blend applies to you specifically and all the style elements that belong to your essences. The report also contains all the outfit photos I took of you during the session and my commentary on them, as well as a generous amount of outfit inspiration images for your essence blend.
